

UL/EN60950 Status of HALO products

All HALO products are designed to meet the requirements of UL/EN60950. All products are manufactured using UL recognized materials in our UL recognized factory.

All HALO TD, TG, MST, MDT1, MDT2 and MGT series have been UL/EN60950 recognized including our functional, supplemental and reinforced families.

The HALO FastJack™ Series will be submitted to UL for UL/EN60950 recognition in August of 2004 with an expected certificate date of Oct.1, 2004.

The FD and FS series of 10BASE-T filters also utilize all UL recognized materials and meet all requirements of UL/EN60950.

For further information please refer to the UL "Yellow Card" for HALO Electronics, file number E177065.
